## DETAILED ACTION

### ***Election/Restrictions***

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - I. Claims 1-10, 16 and 17 are drawn to **Group I**, and classified in class 114, subclass 218. The invention of this group describes an appliance with fastening and retaining elements, and a method of making such appliance.  
(Note: The limitation "*for attachment to a watercraft*" in the claims is an intended use limitation, and therefore, is not given patentable weight).
  - II. Claims 11-15 are drawn to **Group II**, and classified in class 114, subclass 65R. The invention of this group describes a method of attaching an appliance with fastening and retaining elements to a surface of a watercraft.
2. The inventions are distinct, each from the other because of the following reasons:  
Inventions of **Group I** and **Group II** are related as product and process of use. The inventions can be shown to be distinct if either or both of the following can be shown:
  - (1) the process for using the product as claimed can be practiced with another materially different product, or
  - (2) the product as claimed can be used in a materially different process of using that product (MPEP § 806.05(h)).In the instant case, the product as claimed can be used in a materially different process of using that product, such as for an attachment to a dock/pier, or to a land vehicle.

Art Unit: 3617

3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

4. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

The examiner has required restriction between product and process claims. Where applicant elects claims directed to the product, and a product claim is subsequently found allowable, withdrawn process claims that depend from or otherwise include all the limitations of the allowable product claim will be rejoined in accordance with the provisions of MPEP § 821.04. **Process claims that depend from or otherwise include all the limitations of the patentable product will be entered as a matter of right if the amendment is presented prior to final rejection or allowance, whichever is earlier.** Amendments submitted after final rejection are governed by 37 CFR 1.116; amendments submitted after allowance are governed by 37 CFR 1.312.

In the event of rejoinder, the requirement for restriction between the product claims and the rejoined process claims will be withdrawn, and the rejoined process claims will be fully examined for patentability in accordance with 37 CFR 1.104. Thus, to be allowable, the rejoined claims must meet all criteria for patentability including the requirements of 35 U.S.C. 101, 102, 103, and 112. Until an elected product claim is found allowable, an otherwise proper restriction requirement between product claims and process claims may be maintained. Withdrawn process claims that are not commensurate in scope with an allowed product claim will not be rejoined. See "Guidance on Treatment of Product and Process Claims in light of In re Ochiai, In re Brouwer and 35 U.S.C. § 103(b)," 1184 O.G. 86 (March 26, 1996). Additionally, in order to retain the right to rejoinder in accordance with the above policy, Applicant is advised that the process claims should be amended during prosecution either to maintain dependency on the product claims or to otherwise include the limitations of the product claims. **Failure to do so may result in a loss of the right to rejoinder.** Further, note that the prohibition against double patenting rejections of 35 U.S.C. 121 does not apply where the restriction requirement is withdrawn by the examiner before the patent issues. See MPEP § 804.01.
